Principal Investment Strategy

The Micro Cap Strategy's basic investment approach is to make strategic long-term, and to a lesser extent, tactical short-term investments in micro capitalization ("micro-cap") stocks that we feel are undervalued, under followed and/or offer above average growth prospects. The Strategy's investment approach targets a flexible style of both value and growth investments. Key material risks include the risks that stock prices could decline and that the strategy could underperform its benchmark. The Micro Cap Strategy is compared against the Russell Microcap Index.
