Principal Investment Strategy

The Small Cap Focus Strategy investment approach is to make strategic long-term, and to a lesser extent, tactical short-term investments in small capitalization ("small cap") stocks that we feel are undervalued, under-followed and/or offer above average growth prospects. The Strategy targets a flexible style of both value and growth investments and is a concentrated portfolio that may range between 20-30 holdings of small capitalization companies. Key material risks include the risks that stock prices could decline and that the strategy could underperform its benchmark. The Small Cap Focus Strategy is compared against the Russell 2000 Index.
